SUMMARY

Lead Full Stack Engineer with 6+ years shipping production SaaS on ASP.NET Core 10, React, SQL Server, AWS and Azure. Sole engineer on Sponsa, a live creator-monetization platform that has processed $700K+ in payments for 500+ creators, owning architecture, payments (PayPal, Stripe Connect, Ryft), real-time WebSockets, infrastructure and CI/CD end to end.

EXPERIENCE

Lead Full Stack Engineer, CoinBitSolutions — Jan 2020 – Present

Lahore, Pakistan · Joined as Frontend Developer, promoted to Lead in 2024 · Software services company building products for international clients

Sponsa — Creator Monetization Platform (UK client, Remote) — Nov 2023 – Present

Sole engineer: architecture, backend, frontend, infrastructure and DevOps

- Designed, built and operate the entire platform solo (ASP.NET Core 10 API, React frontend, AWS infrastructure, CI/CD) serving 2,000+ users and 500+ creators.
- Integrated PayPal (REST, webhooks, Partner Referrals), Stripe Connect and Ryft, processing $700K+ in payments to date with automated creator payouts.
- Made payment processing safe under failure: webhook signature verification, idempotent webhook handling, retries for failed webhooks and payouts, and payment reconciliation.
- Built the API with JWT auth, role-based authorization, rate limiting, Serilog structured logging and global exception handling.
- Delivered real-time stream overlays over WebSockets, pushing live goal progress into creators' broadcasts.
- Built the React frontend: creator dashboards, public profiles, payment flows, goal tracking and admin panel.
- Run production on AWS: EC2 (Windows Server, IIS), S3 with automated daily backups and lifecycle policies, SSL, security groups and DNS.
- Cut the monthly AWS bill by ~35% by moving media delivery off the EC2/IIS server to S3 + CloudFront, with AWS Lambda generating thumbnails and size-specific image variants for each display context.
- Automated build and deployment of frontend and backend with GitHub Actions; stood up an Azure staging environment (App Service, Azure SQL, Docker images in ACR deployed to AKS, Azure DevOps pipelines).

New Horizon Medical Solutions — US Healthcare SaaS — 2021 – 2023

- Designed and built ASP.NET Core REST APIs for a platform serving US clinics, doctors and patients: patient management, clinic registration, doctor onboarding, inventory tracking and insurance benefits verification.
- Designed the normalized SQL Server schema for patient records, appointments and benefits claims.
- Built the ASP.NET MVC admin portal for user management, reporting and system configuration.
- Defined and documented API contracts with the React and Flutter teams.

KryptoBox — Cryptocurrency Exchange — 2020 – 2022

- Built trading dashboards, order books and transaction-history UIs in ASP.NET MVC Razor and JavaScript.
- Structured React/Next.js authentication and data flows against .NET APIs.

SKILLS

Backend: C#, ASP.NET Core 10, Entity Framework Core, REST APIs, WebSockets, SignalR, JWT/RBAC, Serilog, ASP.NET MVC

Frontend: React, Next.js, TypeScript, JavaScript, TailwindCSS

Payments: Stripe Connect, PayPal (REST, Webhooks, Partner Referrals), Ryft, automated payouts

Cloud & DevOps: AWS (EC2, S3, CloudFront, Lambda, IAM), Azure (App Service, Azure SQL, AKS, ACR, DevOps), Docker, Kubernetes, GitHub Actions, IIS

Data: SQL Server, PostgreSQL, MySQL, LINQ

CERTIFICATIONS

Microsoft Certified: Azure Administrator Associate (AZ-104) — **Aug 2026**

AWS Certified Cloud Practitioner (CLF-C02) — **Sep 2026**

EDUCATION

BSc Mechanical Engineering — University of Engineering and Technology (UET), Lahore — **2017 – 2021**
